

VERY IMPORTANT INFORMATION FOR ALL USERS OF PLANT PROTECTION PRODUCTS

If your business uses plant protection products in Great Britain in a professional capacity, you are legally required to appear on a central register by June 22nd, 2022. This applies to all organisations whatever your size or business structure. The requirement is governed by the Official Controls (Plant Protection Products) Regulations 2020 (OCR) and failure to register is breaking the law. This legal requirement is being backed up by increased inspections and will be enforced.

So, whether you are a one-person business, a golf club, a lawn care business, contractor or whatever, this requirement applies to you and action is needed now. Further information on how to register is on the HSE official website where you will be directed to the government website where you can download the appropriate form. In essence the form requires you to provide general information on your business, how you work with plant protection products or adjuvants and all the quantities involved.

<https://www.gov.uk/government/publications/professional-plant-protection-products-ppps-register-as-a-user>

If your business produces, manufactures, processes, imports, distributes, sells, manufactures or otherwise places pesticides or components on the market, you were required to register using a separate form by 22 September 2021. If you believe your business is in this category and has not yet registered, be aware that you are currently operating outside the law and need to take immediate action.

In Northern Ireland, OCR is being applied but with different timescales. An online registration is available for suppliers of plant protection products and adjuvants which should have been completed by the end of March 2022. Further information on registration for users is yet to be released.

Notes to Editors

The Amenity Forum is the non-profit making voluntary initiative and the independent body bringing together professional organisations with an involvement in the amenity horticulture sector. This is a truly diverse industry responsible for the landscape management of urban areas, highways and rail network, sports grounds, parks, industrial and utility sites. To establish and maintain these areas to a high standard, the sector requires access to pesticides, efficient equipment and trained and qualified staff. The organisation was formed in October 2003 as a key action to support the Voluntary Initiative, an industry led project agreed with Government to reduce the environmental impact of pesticides.

The membership comprises of organisations from across this diverse industry, covering manufacturers, suppliers, trade associations, local authorities, major users, landscape, sport and leisure. Equally important are those members who represent training and qualification standards. The key Government agencies have an important observer role. The objectives of the Amenity Forum are:

To promote and encourage proper and responsible use of pesticides and integrated methods for the control of pests, weeds and diseases

To lead, coordinate and encourage achievement of "Best Practice" objectives in weed, pest & disease management

To ensure that all practices are sustainable and protect the environment with minimised risks to public health.

To run a communication programme to support these aims and to promote the image of the sector among stakeholders and the public.

To coordinate and encourage the establishment of sustainable qualifications, training and CPD activity, specifically for the Amenity sector

To organise activities within the Amenity Forum membership and linked organisations, such that Amenity Forum objectives are developed in a coordinated way

For further information on this press release or the work of the Forum, please contact the Secretary, Kate Hopkins, or the Chairman, Professor John Moverley OBE. Similarly, if you wish to register for future press releases, please let us know.
