

Front Mounted Weed Brush FKDR series

For Ride on Mowers

WKB - H - K - FKDR

- This is our smallest size range of professional, Tractor mounted weed brushes with hydraulic drive for ride on lawn mowers.
- The FKDR/HYD linkage kit must be purchased in order to fit this weed brush. Hydraulics are supplied with the kit and are powered by the mower engine via a belt.
- The FKDR Kit is supplied with an integrated control panel to operate the lift/lower mechanism, angling and engage power to the implement. There are 2 levers. One lever controls the angling left and right. The other lever lifts and lowers the linkage. There is a float position on this lever, when engaged—power will be delivered to the weed brush.
- The FKDR range sport the same robust construction techniques as our pedestrian weed brushes, with CNC folded and welded, heavy gauge steel.
- The Weight on the front of the brush allows aggressive clearing of material by increasing the contact pressure, which can be relieved with the castor wheel.
- Our 8 section 40cm Diameter brush removes engrained dirt, moss and weeds with ease. Using versa brushes to cut and sweep the weeds from the surface.
- Sweeping height is adjusted by heavy duty gauge wheel—the wheel is adjusted by a spindle for precise positioning of the brush.
- Suitable for fitting to a wide range of ride on mowers.
