

PathPro2 for light 4x4s off-road use

**BEST
WARRANTY**

**3 YEARS STANDARD
5 YEARS STRUCTURAL
STEEL & HOPPER**

PathPro2 receiver hitches are available for today's most popular light duty 4x4s.

PERFORMANCE

The plough designed for single site applications. Weighing just 85 - 95kg, the PathPro2 is strong in the right places but light enough to comply to vehicle manufacturers specifications. It is suitable for light duty work and can be mounted on most sub 3.5 tonne commercial 4x4 vehicles commonly found in facilities management duties today. Your vehicle can become a snow plough in just a few minutes, clearing small access roads, driveways and car parks without you breaking in to a sweat. This full width plough (2.00m) features a 450mm depth blade with a steel cutting edge. A Urethane cutting edge is available as an option. The plough features automatic angling to left and right. Lift and lower may be carried out manually or from inside the cab with a electric remote control actuator, depending on your choice of model.

RELIABILITY

Slot & Tab Construction – A strong and more precise way to construct steel fabrications.

Robotically-Welded Seams & Cross-Sections – State-of-the-art robotic welders never get tired and never make a mistake.

Heavy-Duty Trip Springs – Heavier gauge and more efficient design yield the longest service life in the industry protecting your vehicle and plough

DURA-SLICK™ Paint System – Automotive style paint with Teflon® baked on to the steel for durability and better snow-rolling action.

EASE OF USE

When it's cold, wet and dark, struggling with a stubborn snowplough is the last thing you want to do. The PathPro2 attaches or detaches to a 2" receiver hitch in under a minute with just one pin. (no tools required). No need to leave the vehicle cab to angle the plough left or right. The plough is fully floating to follow the contours of the surface.

Easy shipping, storage and installation

- Shipped in 1 box (120cm x 44cm x 51cm)
- Two piece plough construction
- Built up and installed in less than 1 hour with basic hand tools.
- Requires a 2" receiver bracket on your vehicle (see list).

Meyer PathPro2™ Snow Plough

Front EZ Mount snow ploughs suitable
